Didn't find what you're looking for? We can build any size - call us!

Did you know?

- » Did you know our greenhouses are rated up to 80mph (128km) for wind and 30 psf for snow? We can upgrade even higher - ask us how!

Be prepared for changes in weather.

Our greenhouses are rated for 80 mile/150 km per hour winds and 30 pounds per sq. ft. for snow. The greenhouse can be easily upgraded to meet the wind and snow loads in your area.

CROSS COUNTRY GREENHOUSES

Pacific Polycarbonate

- Our Pacific twinwall polycarbonate greenhouse is our most popular model with gardeners requiring a working greenhouse or for those in colder climates.
- The architectural grade polycarbonate is manufactured to prevent yellowing and carries a non-prorated warranty against degradation and damage due to weather.
- Virtually unbreakable, twinwall is designed to withstand the heaviest snow loads and highest winds.

CROSS COUNTRY GREENHOUSES

Traditional Glass

- The Traditional model is our most popular greenhouse design that has been in production since the 1950's.
- Customers enjoy the exceptional value as it maximizes the most available floor space as well as minimizes heating costs due to the reduced volume and lower pitch of the roof.
- Mix and match glazing to suit your climate!
- Single glass, double glass, tinting and other glass options are available for your greenhouse including high performance low E glass. Elegant storefront doors are included with all double glass greenhouses.

Are you curious about polycarbonate?

Our polycarbonate glazing is unbreakable and UV protected to prevent yellowing from the sun. It offers built in shading, is 50% more efficient than single glass and is virtually maintenance free.

"Your product is the most outstanding quality materials I have purchased in the last twenty years. The instructions easy to follow. We actually had fun doing it! Thanks so much."

- Roger Camp

CROSS COUNTRY GREENHOUSES

Cottage Glass

- The Cottage model is our newest straight eave series hobby greenhouse kit. This well designed look matches many common roof styles and architectural design of modern homes and buildings.
- Designed to accommodate additional hanging baskets and taller plants, this straight eave greenhouse kit makes a beautiful statement in your yard.
- Extra wide roof vents and lockable storm door for maximum ventilation.
- Weather resistant and energy efficient saves on heating costs - we even incorporate weather stripping on doors and vents!

Did you know?

» You can mix and match glass and polycarbonate? Any combination is possible!

Do you love the look of glass?

The benefit of glass extends past its beauty. Control light transmission and maximize your daylight hours. Mix and match glazing to optimize your controlled growing environment!

CROSS COUNTRY GREENHOUSES

Cape Cod Glass

- The sophisticated style of a Cape Cod hobby greenhouse adds refinement to any landscape setting. Featured in many national magazines, the Cape Cod offers the steepest roof slope and a New England architectural look and feel. Are you looking for more ridge height? The Cape Cod design accommodates many hanging baskets and young trees.
- All glass is tempered safety glass which is durable and long lasting. The greenhouse is built with a proprietary overlap system should a pane ever be broken, it is simple and inexpensive to replace.
- Double glass provides the tranquility of a living and growing space. Many people integrate seating areas, water features and hot tubs into this design. Check out our website inspiration gallery for some great ideas!

- » Our frames can be any color? We have a happy customer with a periwinkle greenhouse!
- » You have your choice of door hinge – left or right?
- » You can request a door drop free of charge?

CROSS COUNTRY GREENHOUSES

Pacific Home-Attached Polycarbonate

- Our Pacific twinwall polycarbonate greenhouse is our most popular model with gardeners requiring a working greenhouse or for those in colder climates.
- The twinwall polycarbonate diffuses light and provides built-in shading to prevent burning rays on plants as well as provide excellent heat retention in colder months.
- The architectural grade polycarbonate is manufactured to prevent yellowing and carries a non-prorated warranty against degradation and damage due to weather.
- Virtually unbreakable, twinwall is designed to withstand the heaviest snow loads and highest winds.

Increase your living space economically.

Our greenhouses can be attached to most buildings to provide convenient access to services and increase energy efficiency in your home. Ask us how!

CROSS COUNTRY GREENHOUSES

Traditional Home-Attached Glass

- The Traditional model is our most popular greenhouse design that has been in production since the 1950's.
- Customers enjoy the exceptional value as it maximizes the most available floor space as well as minimizes heating costs due to the reduced volume and lower pitch of the roof.
- Mix and match glazing to suit your climate!
- Single glass, double glass, tinting and other glass options are available for your greenhouse including high performance low E glass. Elegant storefront doors are included with all double glass greenhouses.

"Had a very productive first summer. Greenhouse took no ill from Hurricane Igor!"
 - **Daniel Hewitt**

CROSS COUNTRY GREENHOUSES

Traditional Home-Attached Polycarbonate

- Virtually unbreakable, twinwall is designed to withstand the heaviest snow loads and highest winds.
- Fivewall polycarbonate is the most energy efficient glazing on the market today that provides enough light transmission for productive growing and is ideal for colder climates, specialty plants or those who wish to reduce overall heating costs.
- Fivewall greenhouses include a custom door insert for added insulation.
